

Types of Learning

Learning:

Describe the story 'Clever Hans' and how is related to learning?

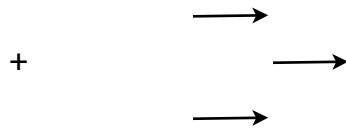

There are two kinds learning:

1) Conditioned learning:

There are two types of conditioned learning

A) Classical Conditioning:

Transfer a natural response from one stimulus to another

Describe **Pavlov's** experiment using the dog and the bell:

In this experiment, what was:

- 1) The unconditioned stimulus?
- 2) The unconditioned response?
- 3) The conditioned stimulus?
- 4) The conditioned response?

Describe **Watson's** experiment with Little Albert:

In this experiment, what was:

- 1) The unconditioned stimulus?
- 2) The unconditioned response?
- 3) The conditioned stimulus?
- 4) The conditioned response?

Generalization:

Extinction:

Now you try it! Record your data from your trails here:

Resting Pulse:	
Hop #1	
Hop #2	
Hop #3	
Hop #4	
Hop #5	
Conditioned Pulse	

B) Operant Conditioning:
Positive Reinforcement:

Negative Reinforcement:

Describe the **Skinner Box** experiment:

What is **conditioned taste aversion**?:

2) Observational Learning:

Bandura identified four processes key to observational learning:

i)

ii)

iii)

iv)

Describe Bandura's Bobo Doll experiment:
